PORTSMOUTH— The Department of Public Works will hold an April 1 public information meeting concerning planned upgrades to the intersection of South Street at Lafayette Road (US Route 1).

The meeting to discuss the planned traffic signal replacement, repaving, curbing and sidewalk work will begin at 6:30 p.m. in City Hall Conference Room A. The project also includes a widening on the southwest corner of the intersection and on South Street in order to provide a left turn pocket for traffic traveling westbound on South Street.

Residents are encouraged to attend and participate in the meeting. DPW staff will present the project details and answer questions. The project work is scheduled to begin in June and end before the opening of the new school year in late August
