Subject: Abutter Notice for 44 Rogers Street

I am modifying my previous response with the following regarding the topic of 44 Rogers Street chimney removal:

We firmly advocate for the preservation of the chimney at 44 Rogers Street. This chimney is a distinctive and a fine example of a style called Bishops Arch or Bishops Cap. It contributes to the historical character of the house. Its unique design adds charm and visual interest to the property and enhances the street. We believe that preserving this chimney will continue to add to the property and the historical character of the time and therefor it is for the above reasons that we request the chimney be preserved as it is and not be removed.

Subject: Comments for Historic District Commission Hearing April 3, 2024

To the Members of the Historic District Commission,

We are writing in support of the petition of Cyrus Beer and Erika Beer, owners of 64 Mount Vernon Street, seeking permission to renovate their existing shed. We are immediate abutters to the Beer property with a direct line of sight from our front door to the proposed work site. We have no objection to the planned renovation and we believe it will make no adverse impact on the appearance and character of our neighborhood. We hope you will vote in favor of Cyrus and Erika's petition. Thank you for your attention and for your service.

Regards,

Brendan Cooney and Megan Tehan

95 Daniel St

Message

Members of the Historic District Commission:

Ladies and Gentlemen,

It has come to my attention that you will be discussing the potential demolition/redevelopment of 95 Daniel St at your April 3rd meeting. Having worked in Portsmouth for nearly eleven years and being a resident here for two, I want to submit my request that any motion to demolish that building be vigorously denied.

You, being members of this commission, are entrusted with our community's living sense of history and place. You are also tasked with being a part of Portsmouth's development.

In this particular scenario, the thought of preserving a rare example of Carpenter Gothic architecture (a design type native to our country in the middle third of the 19th century) far outweighs any possible overly expensive cookie cutter type building developers are pushing all over the Seacoast.

Please do not allow 95 Daniel St to be demolished.

Thank you for your consideration.

Sincerely,

Anthony Conti
