AUTHENTIC, REMARKABLE AND ENERGY-EFFICIENT.

Sierra Pacific all-wood windows and doors offer elegant and luxurious wood exteriors for those who value the extraordinary appearance and performance of natural wood. Choose a wood species and finish option to make a genuine impression.

Choose from select species of wood.

Standard pine exteriors are available primed or natural.

Protected to the very core by our rainforest-proven CoreGuard Plus® wood treatment.

Custom made, by hand, to your exact specifications.

Historical beauty enhanced with advanced technology.

Choose from multiple leading-edge glazing options.

APPENDIX B - SIERRA PACIFIC WINDOWS AND DOORS

Large variety of interior trim profiles.

Designer hardware in many luxurious finishes.

Wood interior provides natural beauty & insulation.

Dual or triple panes, plus decorative glass options.

Windows and doors crafted from pine and Douglas fir are third-party certified to meet the SFI fiber sourcing requirements.

Optional stained or painted interior factory finish using advanced materials & equipment on select products.

RICH, LUXURIOUS, THE NATURAL BEAUTY OF WOOD.

The hand-crafted appeal of real wood gives window interiors and trim a finishing touch that adds warmth and authenticity to any room. Yet every room is different, so we offer nine beautiful species of wood to match or complement any design consideration.

Don't see the perfect wood here? No worries. As long as it's workable, we'll make your interiors out of almost any wood in the world.

A MODERN APPROACH TO A TIMELESS LOOK.

To add your personal touch, our simulated divided lite profiles give you a number of starting points, while our grille configurations are limited only by your imagination. Start with our standard geometries and dream from there.

SIMULATED DIVIDED LITE

The classic look of traditional true divided lite without the energy loss of individual glass panes, our simulated divided lite grilles offer tough extruded aluminum outside with beautiful natural wood inside. Complete the look with optional spacers between the glass. Profiles are also available in all-wood.

GRILLES BETWEEN THE GLASS

Grilles stay out of the way while you still get the look you want.

GRILLE CONFIGURATIONS

Your grilles can be as traditional or as unique as you choose. Our standard configurations include equal lite and Prairie. But with our custom configurations, we're ready to transform your inspiration into reality.

TAKING GLASS TO NEW HEIGHTS, AND WIDTHS.

Reduce window mass, increase the light that fills the room. This is the essence of our direct glaze thinking.

The heart of many contemporary designs, our direct glaze windows create stunningly large expanses of glass with the narrowest sightlines and high-performance glass that truly blurs the lines between inside and outside.

If you're looking for a window that almost lets you forget you have windows at all, explore the amazing things you can do with our direct glaze windows.

H3® direct glaze
also available

CONSIDER DIRECT GLAZE PLUS

This heavy-duty upgrade offers higher energy performance ratings and exceptionally large sizes.

CREATE CONTEMPORARY MASTERPIECES

Many prefer our direct glaze windows for their narrow sightlines that make them a perfect fit for contemporary designs.

Eli's Lens Photography

David Laert Photography

BIG IMPRESSIONS WITH A FEATHER TOUCH.

Our Bi-Fold doors and windows are designed to take contemporary designs to some truly amazing places, turning walls into moving masterpieces. Hinged to fold and glide with the lightest touch, our bi-fold products are available up to 45 feet wide with as many as eight panels.

They stack out of the way on either side of their expansive openings with an optional access panel to allow passage without moving the entire system. They can swing in or swing out, and can even go around a 90-degree corner or 270-degree inverted corner.

Available in low maintenance exterior clad finishes or luxurious all-wood exteriors, the applications are limitless.

OUT OF THE WAY

Large expanses fully open and stack perpendicular to the wall to optimize space.

OPEN TO THE AIR

Our bi-fold windows also create wide expanses that are uniquely inviting and give gathering spaces a charm all their own.

PANELS OF DISTINCTION

When full glass isn't right, panels add a richness and traditional aesthetic that adds warmth and charm. Experiment with our combinations, and find one that opens up a new world of design possibilities.

CHOOSE YOUR STYLE

The combinations of vertical lengths (stiles) and horizontal lengths (rails) give panel doors their unique textured design. Choose from flat panels or raised panels to create a striking accent between two spaces.

GENERATION 4 PRODUCT LINE UP – WOOD AND ALUMINUM CLAD

NW WOOD 540

NW Wood 540 offers the industry’s slimmest, sustainably harvested, premium wood profile providing maximum transparency with a rich, beautiful aesthetic.

- Quadruple Laminated, Cross-Grained, Narrow Wood Frame Delivers Exceptional Energy Efficiency
- Intersection of Two Folding Panels is 5 11/16" (144 mm)
- Floor Supported Panels Capable of Heights Up to 9' 10" (3000 mm)

NW CLAD 740

NW Clad 740 offers the industry’s slimmest, sustainably harvested, premium wood profile with durable aluminum cladding on the exterior to provide maximum transparency with a warm yet contemporary aesthetic.

- Clip-On Cladding Technology, Solid Wood Core, and Narrow Clad Frame Delivers Exceptional Energy Efficiency
- Intersection of Two Folding Panels is 5 13/16" (148 mm)
- Floor Supported Panels Capable of Heights Up to 9' 10" (3000 mm)

APPENDIX D - CENTOR EXTERIOR BI-FOLD SCREEN

S4 Screen & Shade

Effortless Functionality with Elegance

The award-winning S4 Screen allows homeowners with large doors to enjoy the luxury of inside-outside living without the traditional compromises of insects, glare, and loss of privacy. Designed to fit nearly any folding, french, or sliding door, the S4 delivers unparalleled engineering.

Centor's unique load-balancing technology allows screens and shades to glide smoothly across the entire opening and stop effortlessly at any desired position, operating with just a fingertip. When not in use, the screen or shade retracts discreetly into the frame, removing visual distractions to the view outside and protecting it from damage, dust, or dirt.

TECHNICAL FEATURES

- Fabrics are fully retained in the frame with no gaps, allowing total control of insects, sunlight, and privacy.
- Screen fabric is held securely by top and bottom tabs, preventing screen blow-out – even in a breeze.
- S4 can be mounted on the inside or outside. For externally mounted systems, drainage holes are added to the sill.
- Covers are quick and easy to remove to make servicing easy.

Screen & Shade

CONFIGURATIONS

The Centor S4 integrates seamlessly with new or existing openings, whether folding, sliding, corner, or double-panel, regardless of their brand or composition. With a wide range of configurations available, you can tailor the screen and shades to suit the needs of your project. Explore our range of options below to find the perfect solution.

Single | A single screen or shade that extends from one side of the frame and covers the full width of the opening.

Double | Two screens or shades (in the same fabric option), which meet at any point along the opening.

Combination | A combination of two fabric types, with one housed on each side of the frame, such as a screen from the left and a shade from the right.

Jambless | A single screen that does not have a jamb opposite the screen roll. It provides unimpeded access to handles on sliding doors and windows.

XO or OX | A single screen that covers a sliding door opening and stops against the door handle. The second jamb is built into the far wall.

Corner | S4 Cornerless complements large post-less sliding and folding doors. Two screens or two shades meet at a 90-degree angle opening.

Corner XO-OX | Specially designed to pair with two openings either side of a fixed corner window, with two screens that meet the fixed glass panels.

ALUMINUM FRAME

Constructed from durable aluminum, the frame can be painted in one of our popular colors or customized to color-match existing doors and windows. Sills are also available in natural or black anodized finish for greater durability.

Screen & Shade

The Luxury of Inside-Outside Living

SCREEN MESH

Insect mesh is made with durable polyester /PVC mesh construction to meet varying environmental conditions.

Standard Weave - Openness: 46%

Tight Weave - Openness: 37%

SHADE FABRIC

Centor shades come in three forms, each available in a choice of fade-resistant colors to suit any palette.

Notes:

1. Refer to Centor screen installation instructions.
2. Order S4 Screen with "AWAY" stile location to avoid conflict with door handle.
3. Order S4 Screen with "OUTSIDE" location to allow for sill drainage.
4. Refer to Nanawall instructions for door installation and weather proofing.

Double Hung G2

The Marvin Ultimate™ Double Hung G2 window is an embodiment of our dedication to the craft of creating windows and doors. Influenced by the rich, historical significance of this window style and inspired by innovative design, each feature is thoughtfully added and every detail is carefully considered. This is all in service of shaping a window that deserves to be in the unique homes our customers desire.

FEATURES

Suits new construction, remodeling, or full-frame replacement

An all-wood option is ideal for historic renovation projects where a wood exterior is needed to match original architectural details

Expansive custom sizes available

Choose traditional Ogee profiles or square profiles for a more contemporary look

Exterior Finish Options

Extruded Aluminum

Extruded aluminum is an extremely tough cladding that protects wood windows, mimics the profiles of wood, and provides superior durability. It is the most commonly ordered exterior material for our Marvin Ultimate™ products.

Select from our palette of 19 durable extruded aluminum colors, including a spectrum of rich hues and three pearlescent finishes. If you have more specialized needs, we can also work with you to create a custom color.

CUSTOM Your choice

Wood

Wood is a premium material for windows and doors, offering classic aesthetic appeal, many options for customization, and design versatility.

We treat exposed millwork with a water-repellent wood preservative to help it last longer. Choose from one of the three options below. Each is ready to be finished to match your project's exact requirements.

EXTERIOR WOOD SPECIES

PINE

VERTICAL GRAIN DOUGLAS FIR

MAHOGANY

ACCOYA® Exterior trim package only*

* Accoya trim is a high-performance modified wood made from Radiata Pine that undergoes acetylation to minimize water absorption, resulting in exceptional stability and durability for exterior applications

Divided Lites

Marvin® offers divided lites in a number of different styles to create the traditional look of individual panes of glass with the energy efficiency of dual-pane insulation.

Our custom capabilities allow us to create almost any divided lite pattern to match your design style.*

Simulated Divided Lite (SDL)

SDL bars are permanently adhered to both sides of the glass. Simulated Divided Lites with Spacer Bars (SDLs) are an energy-efficient way to create the look of authentic divided lites.

Authentic Divided Lite (ADL)

Separate panes of glass are glazed between muntin bars for historical accuracy. Available exclusively with wood exterior units.

Grilles-Between-the-Glass (GBG)

Grilles are permanently installed between the glass panes. This low-maintenance grille offers the look of a divided lite pattern with the ease of cleaning just one pane of glass. Available with different interior and exterior colors.

Screens

Choose from an aluminum surround in three finishes or a wood interior surround that complements warm wood interiors. Marvin screens come standard with Marvin BrightView™ – a fiberglass screen mesh that provides improved airflow and more natural light while keeping insects out. BrightView repels water and resists dirt and grime for a sharp, clear view.

SCREEN MESH OPTIONS

Marvin BrightView

Charcoal Aluminum Wire

Black Aluminum Aire

Bright Aluminum Wire

Bright Bronze Wire

Charcoal Fiberglass

DOUBLE HUNG SCREENS

Full or **Half Screen**

Exterior aluminum screen with an aluminum surround. The full screen covers both the top and bottom sash. The half screen only covers the bottom sash.

CASEMENT SCREENS

Wood Screen Surround

The patented wood screen surround with wood interior and aluminum exterior features Marvin BrightView screen mesh. Aluminum screen mesh options also available.

Inswing Casement Screen

The patented wood screen surround with wood interior and aluminum exterior features Marvin BrightView screen mesh. Aluminum screen mesh options also available.

DOOR SCREENS

Scenic Door Sliding Screen

The Marvin Ultimate™ Sliding Screen operates with ease and conceals when not in use. The screen is unobtrusive even in large sizes measuring up to 15' wide and up to 10' high uni-directional or up to 29'6" wide bi-parting.

Swinging Screen Door

With profiles that complement the aesthetics of the door, swinging door screens feature robust, durable extruded aluminum surrounds and concealed hinges.

Sliding Screen Door

Aluminum top hung sliding screen with roller bar, adjustable rollers, and unmatched sliding operation.

DOUBLE HUNG STORM OPTIONS

Two-Lite Wood Storm Sash/Screen

A wood frame containing non-removable glass. The storm sash can be removed during the summer and replaced with a wood-framed screen. Available only on wood windows.

Storm and Screen Combinations

A combination unit is composed of two glass panels and one screen panel that can be easily removed from the interior for cleaning. Available with a wood (bare or primed) or aluminum surround, panels can be configured multiple ways: glass above screen, screen above glass, or glass above glass.

Energy Panel

Often confused with storm windows, an energy panel is technically a glazing option. It is a removable, exterior glass panel finished on the edges by a surround. Energy panels cover the exposed glass surface of each sash and offer added energy efficiency for wood windows with single glazing.

Resilient Wood Entry System™ with TM3100-111B

Reserve Wood Entry System™ with TS4300-308C2

Elevate Every Entry

In collaboration with our parent company, Marvin®, we have engineered and extensively tested a family of premium residential wood entry systems that set the tone for the whole home.

Design Forward

We offer more design styles, sizes, and options than anyone else so our customers can create without constraint. The Resilient Wood Entry System™ takes your home to the next level with the most durable painted construction without sacrificing any design options. Our Reserve Wood Entry System™ offers the beauty of stain-grade wood to match the refined elegance of your home.

Materials Matter

TruStile wood entry systems use innovative Accoya® and Tricoya® to provide exceptional stability and durability. All of our entry systems come with industry-leading warranty coverage.
