Closing the Education Funding Structural Deficit Through an Increase in the Statewide Property Tax

October, 1999

by Charlie Connor, State Budget Expert and Lisa Shapiro, Ph.D., Chief Economist,
Gallagher, Callahan & Gartrell, P.A.,
for the Coalition Communities

During the 1999 session, the Legislature passed and the Governor signed House Bill 117 to resolve the Claremont II decision, which found New Hampshire's existing system of paying for public schools unconstitutional. Analysts both in and out of state government readily acknowledged that the roughly \$825 million plan was not fully funded for the first two years. Money will either have to be found in other programs or accounts, or taxes will have to be increased or enacted, to make up the shortfall. In addition, the Claremont plaintiffs are currently before the Supreme Court, challenging whether \$825 million is enough money.

Regardless of the current shortfall, or any new shortfall found by the Supreme Court, recent analyses of the HB 117 School Funding Plan have identified significant deficits in the future years because of a structural deficit built into the HB 117 Plan. Specifically, these researchers predict that spending on education under HB 117 will grow faster than the revenue sources which fund HB 117.

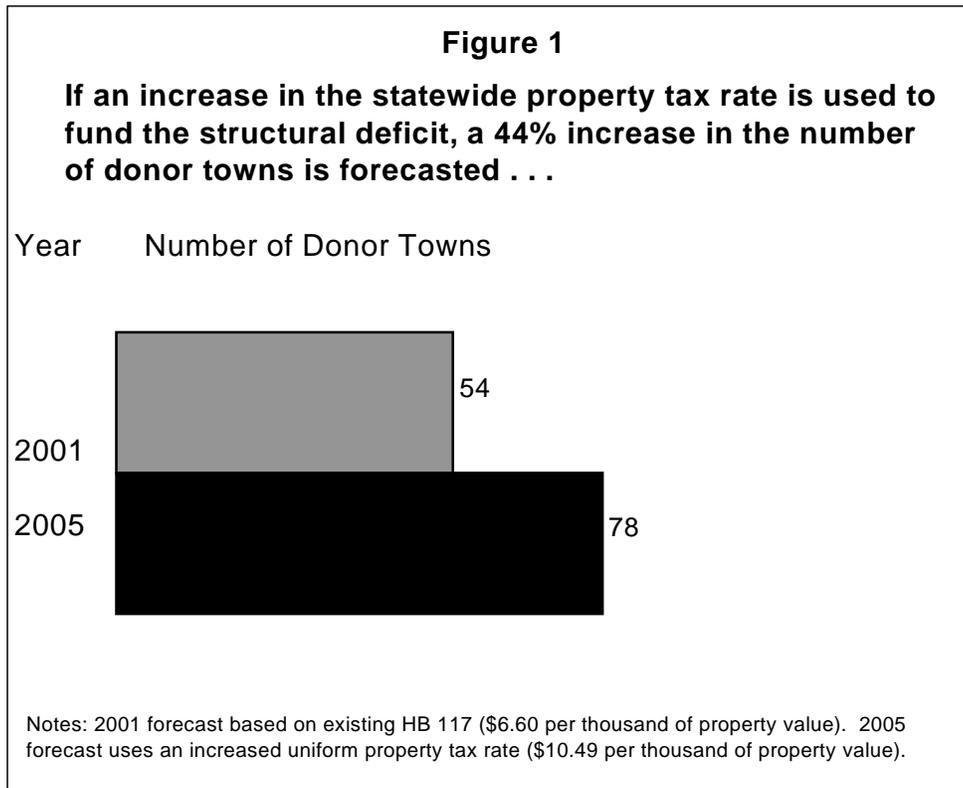

Table 1
Forecasted Annual Education Funding Structural Deficits

	2001	2003	2005
NHCPPS Report	\$70 Million	\$188 Million	\$332 Million
LBAO Report	\$118 Million	\$228 Million	\$361 Million
LBAO Forecasted Deficit as a percent over NHCPPS	69%	21%	9%

Sources and Notes: Doug Hall, School Finance Reform, Shortfall Forecast for the Education Trust Fund, August, 1999, The New Hampshire Center for Public Policy Studies (NHCPPS). New Hampshire Legislative Budget Assistant Office (LBAO) School Funding Entitlement Revenue Shortfall Analysis, August 16, 1999. NHCPPS Report does not forecast 2005. See Appendix B for Technical notes.

The single largest revenue-raising instrument included in the current HB 117 Plan is the uniform statewide property tax, set at \$6.60 per thousand of property value¹. This report, using the more conservative NHCPPS assumptions, analyzes the dynamics of using an increase in a statewide property tax to close the HB 117 structured deficit.

We find that, if the statewide property tax is re-set to close the structural deficit in the HB 117 Plan, the uniform property tax rate would increase 59 percent, to \$10.49 per \$1,000 of value in 2005. The number of donor towns would increase by nearly 50 percent, and the amount of money leaving donor towns would increase almost threefold.

¹ HB 117 sets as \$6.60 per Total Equalized Value less utility property in a community; thus, the actual rate would be higher as applied against Equalized Assessed Value (unless changes are made to the law).

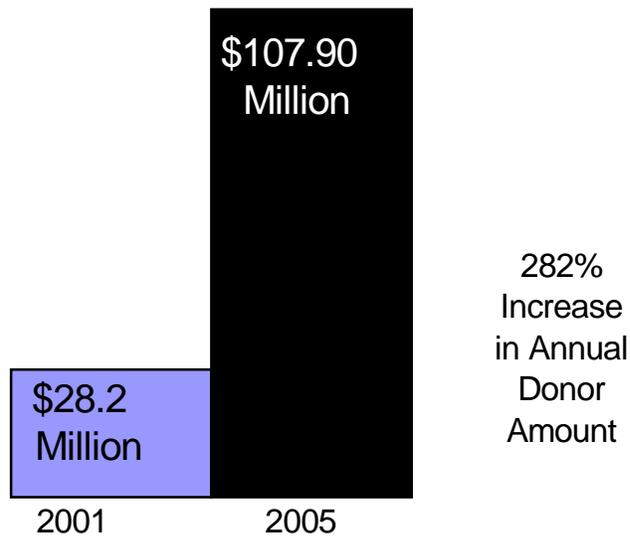

If new or increased state taxes (or reductions in state expenditures) are used to close the structural deficit, we predict fewer donor towns over time. But if an increase in the uniform property tax is used to close the gap, an estimated 24 towns become new donors by 2005:

New Donor Towns

Atkinson	Newfields
Bedford	Pittsburg
Clarksville	Randolph
Conway	Salem
Dublin	Sanbornton
Gilford	Seabrook
Harrisville	South Hampton
Hollis	Springfield
Kensington	Stratham
Lebanon	Washington
Lyme	Windham
Meredith	Woodstock

More than \$100 Million is forecasted to leave donor towns annually by 2005 if the statewide property tax is used to close the deficit.

Total Annual Donor Amounts

Notes: 2001 forecast based on existing HB 117. 2005 forecast uses an increased uniform property tax rate to close the deficit.

In addition, if the uniform statewide property tax is increased to close the forecasted structural deficit, there will be winners and losers among the receiver towns. Comparing 2001 at the current statewide property tax rate of \$6.60 per thousand, with 2005 at an increased statewide property tax rate of \$10.49 per thousand, shows:

- total education grants to receiver towns drop by 8%, or about \$30 Million annually
- more than 60% of receiver towns in 2001 will receive less money in 2005; the rest will receive more.

Appendix B

Explanation of Assumptions

Assumptions for this report rely primarily on the New Hampshire Center for Public Policy Studies "School Finance Reform: Shortfall Forecast For Education Trust Fund" report authored by Douglas E. Hall, which essentially agrees with a Legislative Budget Assistant Office (LBAO) report of August 16, 1999, titled "School Funding Entitlement Revenue Shortfall Analysis."

From the Center for Public Policy Studies report , Table 1, pg. 2 tax base growth of 5% annually, pg. 7 for Base Cost/Pupil growth of 7% per year, and Table 1 pg. 2 for deficit forecast for FY 2003. The estimated funding gap for FY 2005 assumes expenditures will continue to increase at growth rates used to determine FY 2003. The funding gap is estimated by adjusting the LBAO's estimated funding gap for FY 2005 by substituting our estimate of the yield from the statewide property tax for the LBAO estimate.

Donor communities phase-in was considered in the aggregate as an available but declining resource to fund the HB 117 school funding plan. No other adjustments were made that would reflect the impact of the phase-in on individual donor communities.

The estimated amount of money paid to the state by donor towns reported in Appendix A should not be taken as an estimated impact on local taxes as such an estimate would require additional analysis to take into account numerous local factors beyond the scope of this report. All dollars are in nominal values.
