

Funding

NHRS benefits are funded by member contributions, employer contributions, and net investment returns. Investment returns historically provide the majority of funding for pension benefits.

The New Hampshire Constitution (Article 36-a) protects trust fund assets for the exclusive purpose of providing benefits; requires Trustees to set actuarially sound employer contribution rates; and requires employers to pay those rates in full.

Trust Fund

The retirement system trust fund stood at \$8.29 billion as of June 30, 2017.

On that date, NHRS was 61.8% funded and had an Unfunded Actuarial Accrued Liability (“unfunded liability”) of \$5.04 billion. The unfunded liability is the difference between the actuarial value of the retirement system’s assets and the actuarial value of benefits already accrued.

The NHRS unfunded liability results from several factors, including legislative decisions made in the 1990s, investment losses in the 2008-09 great financial crisis, and the adoption of more

conservative actuarial assumptions in the past decade.

Having an unfunded liability does not mean that a pension plan is unable to pay the benefits for which it is presently obligated or to meet its cash flow requirements.

Assets are available to pay present benefits and a funding mechanism is in place to pay off the unfunded liability by 2039.

Contribution Rates

By statute, Group I (Employee & Teacher) members contribute 7% of their salary to NHRS. Group II (Police & Fire) members contribute 11.55% and 11.80%, respectively. Group II members do not participate in Social Security.

While member rates are set by statute, employer rates are determined every two years after a biennial actuarial valuation is conducted.

Employer contributions are assessed at different rates for state employees, political subdivision employees, teachers, police, and fire.

Employer rates for fiscal years 2020-21 will be certified by the Board of Trustees in September 2018.

Rev. 12/2017

Board of Trustees

NHRS has a unique status in state government. It is not a state agency under the executive branch; it is a component unit of the state governed by statute and overseen by a Board of Trustees. Trustees are fiduciaries bound by law to act solely in the interest of the members and beneficiaries of the pension plan.

A Quick Guide to the
New Hampshire
Retirement System
for Members, Retirees,
Employers, and Lawmakers

NHRS at-a-glance

From the Executive Director

This brochure offers a snapshot of the New Hampshire Retirement System (NHRS, the retirement system), which was established in 1967 as a contributory, defined benefit plan. The plan provides lifetime pension benefits, as well as disability and death benefits. It also provides a post-retirement Medical Subsidy benefit to eligible beneficiaries.

Benefit formulas and eligibility requirements are set by state law (RSA 100-A). The retirement system is also governed by administrative rules, policies adopted by the NHRS Board of Trustees, and the Internal Revenue Code.

NHRS has a very important role in the economic well-being of New Hampshire's retired public employees, teachers, police officers, and firefighters. In the fiscal year ended June 30, 2017, NHRS had nearly 48,000 members and more than 35,000 retirees and beneficiaries; it paid out a total of \$756.9 million in benefits.

Our mission is simple: "To provide secure retirement benefits and superior service."

All of us at NHRS are committed to the professional management and administration of pension benefits for the exclusive benefit of all of our members and beneficiaries.

*George P. Lagos,
NHRS Executive Director*

Membership

NHRS members are full-time state, county, and municipal employees, teachers, police officers, and firefighters. The membership consists of two groups: Group I (Employee & Teacher) and Group II (Police & Fire).

Active Members

As of June 30, 2017

Employee	24,478
Teacher	17,617
Police	4,151
Fire	1,640
Total	47,886

Note: There are also 2,281 members no longer working in NHRS-eligible positions who are "vested," meaning they have earned a future benefit, and 10,477 non-vested members no longer working in NHRS-eligible positions who have kept their accumulated contributions with the retirement system.

Participating Employers

NHRS has 471 participating employers – the State of New Hampshire, counties, individual communities,

school districts, and others. Not every New Hampshire political subdivision participates in the retirement system for its employees, although most do. Participation is mandatory for police, fire, and teacher employers.

Retirees/Beneficiaries

As of June 30, 2017

Employee	17,573
Teacher	12,696
Police	3,786
Fire	1,639
Total	35,694

Average Annual Benefit

As of June 30, 2017

Employee	\$13,451
Teacher	\$21,804
Police	\$35,903
Fire	\$39,033
Total Average	\$19,788

NHRS paid \$706.3 million in pension benefits in fiscal year 2017. In addition to pensions, the retirement system paid \$50.6 million in post-retirement Medical Subsidy benefits. With more than 80% of retirees and beneficiaries living in New Hampshire, these benefit payments have a significant impact on the state's economy.

Investments

NHRS pursues an investment strategy designed to meet its long-term funding requirements. The Board of Trustees, with research and input from NHRS investment staff, outside experts, and a recommendation from the Independent Investment Committee, sets an investment policy that includes asset allocation and an assumed rate of return.

The Independent Investment Committee manages investments based on the Trustees' policies, continuously monitors and evaluates performance, and makes

determinations regarding the hiring and retention of fund managers.

The goal is to meet or exceed the retirement system's assumed rate of return over the long term, while at the same time managing the risk, return, and liquidity of the portfolio.

NHRS realized a 13.5% return on its assets in fiscal year 2017. The assumed rate of return is 7.25%.

The three-, five-, 10-, 20-, and 25-year returns for the periods ended June 30, 2017, were 5.8%, 9.8%, 5.7%, 6.8%, and 8.2%, respectively.
