

## Wayfinding Bid Questions

### Bid 07-25 – Addendum 2

1. For sign PED 2.1, 4.5” does not exist per our estimator, would the city prefer 4” diameter square posts or 5” diameter square posts?

*Response: Sign type Ped 2.1 will be mounted to an existing light pole. Sign type Ped.1 specifies a 4.5” square post. If 4.5” is unavailable the city would prefer a 4” square post for sign type Ped.1 and all VDIR sign types should specify a 5” square post.*

2. Why did the city turn down both of the previously received bids?

*Response: The previous bid 48-24 did not include separate phases for Pedestrian signs and Vehicular signs. All bids that were received exceeded budgeted amounts for the project.*
